

# Data Wrangling

## We Rate Dogs

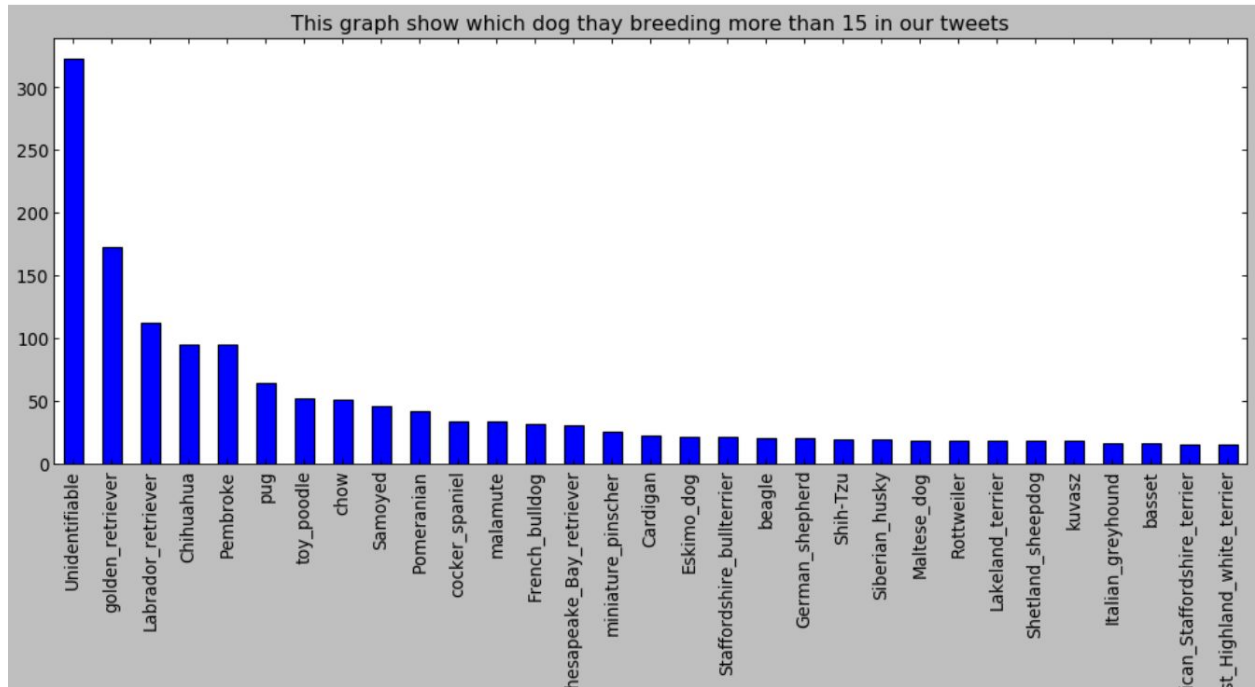

We Rate Dogs is a famous and popular twitter account, the fowlers they tweets the picture(for dogs) and rate it from 1 to 10, our task is gathering and assessing, cleansing thesis data and merge them, after that analysis it and write a reports one with steps other with conclusion.

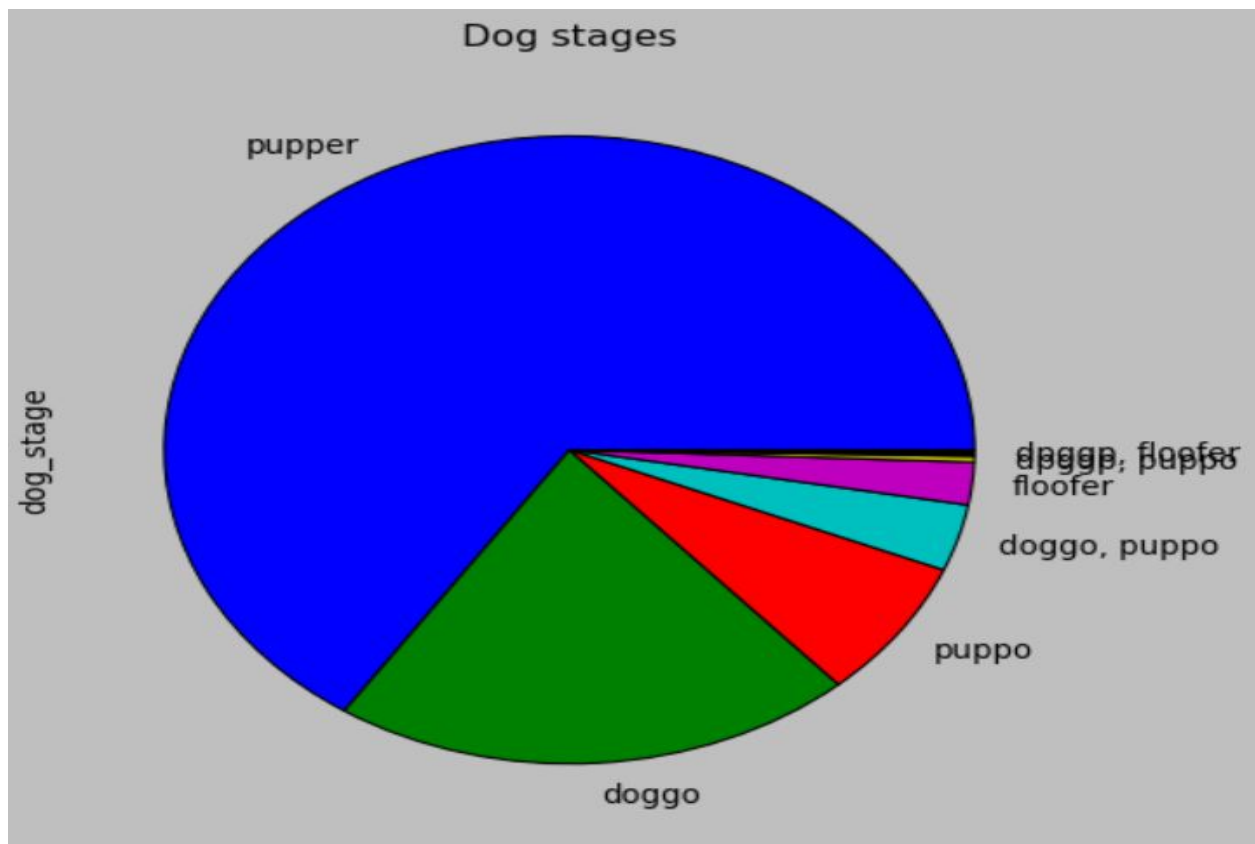

We can see is this graph over time the tweets increasing

In this graph we can see the yellow is favorite and the blue is retweet count over time.

In this graph we can see the most breeding that accounts is tweeting.

In this graph we can see most popular dogs species

**My conclusion is who the love dogs is increasing over time and the Hybrid dogs dose not a popular, all account who they active come more active over time.**
